ABOUT ME

Mai Humood Al Turaiki
Place of birth Zulfi - Riyadh
Date of Birth 11-9-1988 m

EDUCATION

EDUCATION1 Bachelor of Physics - Majmaah University
EDUCATION2 Master of Biomedical Physics, College of Science, King Saud University

WORK EXPERIENCE

Member of the ISO Committee for Occupational Safety and Health in Physics Labs 1436-1437 AH - Majmaah University
Member of the internal evaluation committee for quality requirements for occupational safety and health for the chemistry and physics departments 1436-1437 AH - Majmaah University
Member of the Student Laboratories Committee, Department of Physics, College of Education, Al-Zulfi, Majmaah University
Member of the Academic Advising Committee, Department of Physics, College of Education, Al-Zulfi, Al-Majmaah University
Head of the activity of female students in the College from 1435-1437 - College of Education in Al-Zulfi - University of the University
Member of the Disciplinary Board Committee for female students in the College in 1434-1435 - College of Education in Al-Zulfi - University
Supervisor of the sixth scientific conference of students of higher

education in 1436 e - College of Education in Al-Zulfi - University of the University

Supervisor of the seventh scientific conference of the students' higher education 1437 e - College of Education in Al-Zulfi - University

President of the Center for Innovation and Distinguished Student Ideas from 1435-1437 AH - College of Education in Al-Zulfi - Al-Majmaah University

Head of the Center for talent and creativity in 1435-1437 e - College of Education in Al-Zulfi - University of the University

Research Experiences

.... **My work at the Laboratory of Molecular and Cellular Biology gave me the opportunity to learn the correct scientific basis for dealing with living cells and tissues outside the body of the organism. I have also trained in the labs of the Central Laboratory at King Saud University for my research work on how to prepare samples of the scanner electron microscope , Basic principles in cell culture**

I was lucky to have more independence in my research and practice. I also knew how to deal with cancer cells outside the organism and plant them and learn to conduct cellular toxicity tests.....
