Badir, A. (2004). "A review of international critical care education requirements and comparisons with Turkey." Connect: The World of Critical Care Nursing, **3**(2): 48-51.

Critical care units are dynamic, high-tech environments where nurses are required to complete specialised programmes of education to meet the specialist needs of patients and to cope with rapidly changing technology and therapies. There are many differences in post-basic critical care nursing specialisation programmes in the European countries. However, it is recommended that specialist education should be at a postgraduate level, delivered by university institutions or equivalent counterparts, and should be recognised and approved by a governmental and/or professional organisation.

## إعداد الببليوجرافيات

▶ الغرض النهائي والأخير من التعامل مع البرنامج هو إدراج المراجع / الاستشهادات المختارة في ملفات الورد / ملف البحث الخاص بالباحثات

ويتم ذلك بإحدى طريقتين:

▶ **الأولى** : باستخدام خاصية نسخ المرجع في قالبه المخصص والمحدد بالمكتبة

**EndNote Copy Formatted option**

▶ **الثانية** : استخدام خاصية استشهد أثناء الكتابة الخاصة بالبرنامج :

**EndNote's Cite While You Write (CWYW)**

# الطريقة الأولى

## EndNote's Copy Formatted feature

The screenshot shows the EndNote application window with the 'Edit' menu open. The 'Copy Formatted' option is highlighted in blue. A green arrow points from the 'Copy Formatted' option to the text in the main window. The main window displays a list of references with columns for Author, Year, and Title. The reference for 'Baumgarth' is selected.

On the Insert tab, the galleries include items that are designed to coordinate with the overall look of your document. You can use these galleries to insert tables, headers, footers, lists, cover pages, and other document building blocks. When you create pictures, charts, or diagrams, they also coordinate with your current document look. (Featherstone & Lei, 2009)

You can easily change the formatting of selected text in the document text by choosing a look for the selected text from the Quick Styles gallery on the Home tab. You can also format text directly by using the other controls on the Home tab. Most controls offer a choice of using the look from the current theme or using a format that you specify directly.

To change the overall look of your document, choose new Theme elements on the Page Layout tab. To change the looks available in the Quick Style gallery, use the Change Current Quick Style Set command. Both the Themes gallery and the Quick Styles gallery provide reset commands so that you can always restore the look of your document to the original contained in your current template.

Abstract: customer Relationship Management (CRM) systems have been seen to offer significant advantages to organisations seeking a more professional approach to the acquisition and retention of customers. The majority of early implementations have been reported as failures. There is substantial evidence to suggest that the high failure rate reflects excessive reliance on technology alone to improve performance and that insufficient attention has been paid to organisational and behaviour-related issues. This paper considers evidence from two longitudinal case studies in medium-sized companies that operate in the business-to-business sector. The first investigates the operational risks to CRM implementations and subsequently a three-dimensional model is developed to illustrate how the cognitive schemas and values of the actors in the implementation process may influence the emergence of risks to the implementation and subsequent business performance. The second case study is based on video recordings from the implementation process to study the behaviours of the actors and validate the model. Evidence emerges that although project management and resource allocation was poor the implementation was, nonetheless, considered successful. The paradox of success despite functional inadequacy is explored further to reveal evidence of shared motivation to make the project successful and flexibility in the relationships between the main groups of actors. Analysis of the data reveals implicit contracts between the main groups of actors within the consensus of a will to succeed. These
